Avionics Databus
Solutions

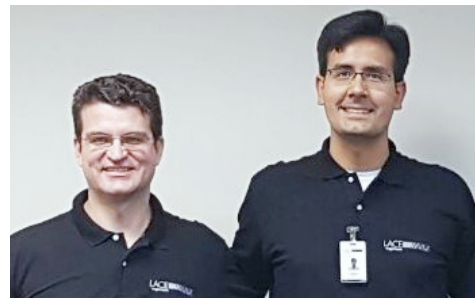

AIM and LACE tie up for Avionics Test in Brazil!

AIM GmbH, leading manufacturer and supplier of avionics databus/network test solutions for the Aerospace and Defense applications, has appointed LACE Engenharia based in São José dos Campos, as their exclusive Representatives for Brazil. This enables LACE to market, sell and support AIMs comprehensive range of test and simulation products for MIL-STD-1553, STANAG3910/EFEX, ARINC429, AFDX/ARINC664P7, ARINC825 (CAN Bus) and Fibre Channel/ARINC818 test applications.

Rodrigo Junqueira, Business Director of LACE Engenharia, leads the local team and remarked that "Brazilian aerospace market is strong and growing. We have a diverse industry, which includes aircraft manufactures, airlines, aircraft maintenance service centres and defence system developers. These sectors have well established R&D facilities with an increasing demand for AIM products. We are confident that our partnership with AIM compliments the LACE portfolio of product and service solutions, allowing us to help our customers in their developments."

He also adds "LACE Engenharia is well prepared and motivated to promote and deliver AIM services and products in the best of class spirit that has led AIM to its inspiring lead market position."

LACE Engenharia is a Brazilian-based company founded in 2015. The company specializes in EMI/EMC solutions and is a state-of-the-art full-service and product provider for the aerospace and the automotive industries. This agency was selected due to their aircraft systems as well as test and measurement expertise in the airspace industry being a state-of-the-art provider for the aerospace and other sectors. > www.laceeng.com.br
