Avionics Databus
Solutions

AIM and Phoenix Technologies take flight for Avionics Test in Israel!

AIM GmbH, leading manufacturer and supplier of avionics databus/network test solutions for the aerospace and defense applications, has appointed Phoenix Technologies as their exclusive representatives for Israel.

This enables AIM to market, sell and support its copious range of test and simulation products for MIL-STD-1553, ARINC429, AFDX/ARINC664P7, ARINC825 (CAN Bus) and Fibre Channel/ARINC818 test applications into the Israeli defense and aerospace market.

Doron Adivi, Product Line Manager of Phoenix who leads the marketing and sales of AIM products comments "As a leading representative and distributor in Israel engaged in the supply and support of state of the art components, modules and test and development tools, Phoenix Technologies Ltd. now offers the AIM product line, which complements our existing product portfolio, enabling us to provide test solutions as well as components for our customers. Phoenix is the distributor for HOLT devices who supply MIL-STD-1553 and ARINC429 components. Now with AIM, we act as a complete solutions provider including the test equipment."

AIM GmbH - Celebrating 30 years!

AIM GmbH has been in the avionics test and simulation market since 1989 with the core business design and manufacture of high performance and quality databus/network test and simulation
